

MANTHAN KUMAR

+91 6202929010 | maxmanthan111@gmail.com | [Bangalore, India](#) | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

Professional Summary

Frontend Engineer with nearly 3 years of experience building scalable AI SaaS products using React, Next.js, TypeScript and modern frontend architecture. Experienced in developing high-performance interfaces, reusable component systems, AI-powered workflows, and production-grade web applications in fast-paced startup environments. Passionate about building developer-focused products with strong emphasis on performance, usability, and clean architecture.

Technical Skills

Frontend: React.js, Next.js, TypeScript, JavaScript ES6+, HTML5, CSS3, Tailwind CSS, Redux, React Query, ShadCN UI

Architecture & UX: Reusable Components, Component Architecture, State Management, Responsive Design, Cross-Browser Compatibility, UI/UX, Accessibility, Performance Tuning

AI/Product: Generative AI Interfaces, Agentic AI Workflows, AI-Enabled Automation, LLM-Based Features, User-Centric SaaS Products

Backend/Tools: Node.js, REST APIs, API Integration, Git, GitHub, Docker, Vercel, AWS, Nginx, MongoDB, MySQL

Core: DSA, OOPS, DBMS, Operating Systems, Computer Networks, System Design, Agile Development

Experience

SDE 2

Dec 2025 – Present

- Origina* *Bangalore, Karnataka*
– Architected scalable frontend applications for a multi-tenant AI platform using **Next.js, React, TypeScript, and Tailwind CSS**.
– Designed reusable component libraries and implemented RBAC, improving maintainability and development velocity.
– Built an embeddable AI chat widget with real-time messaging, lead capture, and REST API integrations.
– Developed a Python monitoring platform using **Playwright, Supabase, and n8n** to track inventory changes and trigger automated alerts.

Frontend Engineer

Nov 2024 – Dec 2025

- ReachInbox* *Bangalore, Karnataka*
– Engineered frontend experiences for **reachinbox.ai** and **mailverify.ai**, strengthening usability, scalability, and performance for high-volume SaaS workflows.
– Shipped **Generative AI-enabled** features including a spam keyword checker and auto email reply generator, accelerating campaign execution and improving user productivity.
– Revamped **mailbox purchasing** and **onboarding** flows, contributing to revenue growth from **\$5M to \$10M ARR**.
– Created reusable frontend components and resolved **2–4 daily** customer-facing Intercom issues, improving product stability and reducing repetitive engineering effort.
– Contributed to platform growth across **10K+ active users, \$40K MRR, 100K+ campaigns**, and **500K+ emails sent**.
– Implemented AI-assisted SaaS automation interfaces and productivity-focused UI experiences while balancing responsiveness, scalability, and maintainable frontend architecture.
– Helped ReachInbox earn recognition as the **AppSumo Deal of the Year 2024**.

Frontend Engineer

Sep 2023 – Nov 2024

- Openinapp* *Bangalore, Karnataka*
– Launched a **Next.js media sharing platform** enabling creators to generate over **\$50K in revenue** from **20K+ uploads**, expanding creator monetization and audience reach.
– Implemented an **AI-enabled affiliate link generation interface** for YouTube creators, impacting creators with **1M+ subscribers** and generating over **\$15K in revenue**.
– Refactored legacy frontend components by removing **4,000+ lines** of redundant code, reducing bundle size by **50KB** and improving performance by **8%**.
– Streamlined B2B dashboard architecture by centralizing layout logic, preventing unnecessary renders and API calls, and improving dashboard performance by over **50%**.
– Enhanced platform workflows, UI responsiveness, and product usability, contributing to over **200% growth** in average monthly clicks.
– Implemented responsive, cross-browser compatible interfaces to deliver consistent user experiences across devices and screen sizes.

Projects

Web Builder | [GitHub](#) | [Live](#) | *Next.js, React.js, ShadCN UI, Tailwind CSS*

Mar 2024 – Jun 2024

- Engineered a drag-and-drop web builder using **Next.js** and **React.js**, enabling non-technical users to create and edit websites with reduced setup complexity.
– Designed reusable editor components and interactive UI workflows, reducing website creation time by **50%**.
– Improved rendering performance and interaction smoothness, reducing loading time by **24%** during testing.
– Implemented responsive layouts and scalable frontend patterns to support cross-device usability and future feature expansion.

Education

Dayananda Sagar College of Engineering, Bengaluru

Aug 2019 – Jun 2023

B.Tech in Civil Engineering

Bengaluru, Karnataka

Additional: Strong interest in frontend architecture, AI platforms, developer tooling, and scalable product engineering.
